S32-205	Neuro and Spine	Rubio Needle Holder & Wire Twister, Tungsten Carbide, Serrated Jaws, Snub Nose, 7 5/8" (19.4 Cm)	A detailed line drawing of a surgical instrument. It features a long, thin, straight handle with a small circular hole near the top. The jaws are curved and have a serrated edge. The tip is a "snub nose" design, which is slightly rounded and angled. The jaws are made of tungsten carbide and have a serrated edge for grip.
S60-1996	Neuro and Spine	Ruedemann Lacrimal Dilator, Short, Needle Type	A detailed line drawing of a surgical instrument. It has a long, thin handle with a small circular hole near the top. The jaws are straight and pointed at the end, designed to be inserted into a narrow space. The jaws are made of a flexible material, likely stainless steel.
S44-3730	Neuro and Spine	Ruler, Graduated In Cm & Inches, 12" (30.5 Cm)	A detailed line drawing of a surgical ruler. It is a straight, thin metal rod with markings in centimeters and inches. The centimeter markings are on the left, and the inch markings are on the right. The ruler is 12 inches (30.5 cm) long.
S44-3750	Neuro and Spine	Ruler, Graduated In Cm & Inches, 19 3/4" (50.0 Cm)	A detailed line drawing of a surgical ruler. It is a straight, thin metal rod with markings in centimeters and inches. The centimeter markings are on the left, and the inch markings are on the right. The ruler is 19 3/4 inches (50.0 cm) long.
S44-3715	Neuro and Spine	Ruler, Graduated In Cm & Inches, 6" (15.2 Cm)	A detailed line drawing of a surgical ruler. It is a straight, thin metal rod with markings in centimeters and inches. The centimeter markings are on the left, and the inch markings are on the right. The ruler is 6 inches (15.2 cm) long.
S44-3720	Neuro and Spine	Ruler, Graduated In Cm & Inches, 8" (20.3 Cm)	A detailed line drawing of a surgical ruler. It is a straight, thin metal rod with markings in centimeters and inches. The centimeter markings are on the left, and the inch markings are on the right. The ruler is 8 inches (20.3 cm) long.
S55-5498	Neuro and Spine	Rumel Tourniquet & Obturator, Obturator Only, Adult, 12" (31.5 Cm)	A detailed line drawing of a surgical instrument. It consists of a long, thin metal tube with a flared, obturator-shaped end. The tube is 12 inches (31.5 cm) long and is designed to be inserted into a blood vessel to stop the flow of blood.
S55-5499	Neuro and Spine	Rumel Tourniquet & Obturator, Obturator Only, Child, 8 1/4" (21.0 Cm)	A detailed line drawing of a surgical instrument. It consists of a long, thin metal tube with a flared, obturator-shaped end. The tube is 8 1/4 inches (21.0 cm) long and is designed to be inserted into a blood vessel to stop the flow of blood.
S55-0995	Neuro and Spine	Rumel Tourniquet & Obturator, Tourniquet W/ Obturator, Child, 8 1/4" (21.0 Cm)	A detailed line drawing of a surgical instrument. It consists of a long, thin metal tube with a flared, obturator-shaped end. The tube is 8 1/4 inches (21.0 cm) long and is designed to be inserted into a blood vessel to stop the flow of blood. This model includes the tourniquet and obturator in a single unit.
S55-0990	Neuro and Spine	Rumel Tourniquet & Obturator, Tourniquet W/ Obturator, Flexible Neck, Adult W/ Out Ratchet, 12" (31.5 Cm)	A detailed line drawing of a surgical instrument. It consists of a long, thin metal tube with a flared, obturator-shaped end. The tube is 12 inches (31.5 cm) long and is designed to be inserted into a blood vessel to stop the flow of blood. This model has a flexible neck and does not have a ratchet mechanism.
S55-0993	Neuro and Spine	Rumel Tourniquet & Obturator, Tourniquet W/ Obturator, Flexible Neck, Adult W/ Ratchet, 12" (31.5 Cm)	A detailed line drawing of a surgical instrument. It consists of a long, thin metal tube with a flared, obturator-shaped end. The tube is 12 inches (31.5 cm) long and is designed to be inserted into a blood vessel to stop the flow of blood. This model has a flexible neck and includes a ratchet mechanism for better control.
S75-7452	Neuro and Spine	Rush Awl & Reamer, Grip Handle, Sharp, 2.5 Mm Diameter, 7 1/2" (19.0 Cm)	A detailed line drawing of a surgical instrument. It has a long, thin handle with a grip handle. The tip is sharp and pointed. The handle is 7 1/2 inches (19.0 cm) long and has a 2.5 mm diameter.
S75-7453	Neuro and Spine	Rush Awl & Reamer, Grip Handle, Sharp, 3.0 Mm Diameter, 8 1/4" (21.0 Cm)	A detailed line drawing of a surgical instrument. It has a long, thin handle with a grip handle. The tip is sharp and pointed. The handle is 8 1/4 inches (21.0 cm) long and has a 3.0 mm diameter.

S08-0021	Neuro and Spine	Yasargil Micro Bipolar Bayonet Forceps, Flat Handle, 0.5 Mm Tip, Insulated, 7 7/8" (20.3 Cm)	A detailed line drawing of a medical instrument, specifically a bipolar forceps. It features a long, thin, straight handle extending horizontally to the left. At the distal end, there are two sharp, curved, black-tipped jaws that are slightly open. The jaws are made of a fine, mesh-like material, likely platinum wire, which is standard for bipolar cautery.
S08-0015	Neuro and Spine	Yasargil Micro Bipolar Bayonet Forceps, Flat Handle, 0.7 Mm Tip, 6 3/4" (17.0 Cm)	A detailed line drawing of a medical instrument, specifically a bipolar forceps. It features a long, thin, straight handle extending horizontally to the left. At the distal end, there are two sharp, curved, black-tipped jaws that are slightly open. The jaws are made of a fine, mesh-like material, likely platinum wire, which is standard for bipolar cautery.
S08-0018	Neuro and Spine	Yasargil Micro Bipolar Bayonet Forceps, Flat Handle, 0.7 Mm Tip, 7 1/8" (18.0 Cm)	A detailed line drawing of a medical instrument, specifically a bipolar forceps. It features a long, thin, straight handle extending horizontally to the left. At the distal end, there are two sharp, curved, black-tipped jaws that are slightly open. The jaws are made of a fine, mesh-like material, likely platinum wire, which is standard for bipolar cautery.
